REPORT TO: **PENSION SUB-COMMITTEE OF THE CITY GOVERNANCE COMMITTEE & PENSION BOARD – 11 DECEMBER 2023**

REPORT ON: **TREASURY MANAGEMENT ACTIVITY 2023/2024 (MID-YEAR REVIEW)**

REPORT BY: **EXECUTIVE DIRECTOR OF CORPORATE SERVICES**

REPORT NO: **374-2023**

1 PURPOSE OF REPORT

To review Tayside Pension Fund's Treasury Management activities for the period 1 April 2023 to 30 September 2023.

2 RECOMMENDATION

The Sub-Committee is asked to note the contents of the report.

3 FINANCIAL IMPLICATIONS

The Treasury Management activity during the first half of the current financial year indicates that investment income from cash balances held to pay pension benefits will be approximately £825,000 for 2023/2024.

4 BACKGROUND

Tayside Pension Fund is administered by Dundee City Council in accordance with Section 24 of its Financial Regulations. Investment policy and decisions (including those relating to Treasury Management) are delegated to the Pension Sub-Committee of the Policy and Resources Committee. The Pension Board assist the Sub-Committee with securing compliance to the regulations.

The primary objective of the Tayside Pension Fund is to provide for scheme members' pension and lump sum benefits on their retirement or for their dependants on death before or after retirement, on a defined benefits basis. There is limited discretion to vary these benefits.

Dundee City Council in its administering role, defines its treasury management activities as:

"The management of the authority's investments and cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks."

It regards the successful identification, monitoring and control of risk to be the prime criteria by which the effectiveness of its treasury management activities will be measured. Accordingly, the analysis and reporting of treasury management activities will focus on their risk implications for the organisation and any financial instruments entered into to manage these risks.

It acknowledges that effective treasury management will provide support towards the achievement of its business and services objectives. It is therefore committed to the principles of achieving value for money in treasury management and to employing suitable performance measurement techniques, within the context of effective risk management.

All treasury management activities must comply with the appropriate regulations, codes and guidance as stated in the Treasury Management Policy Statement of Dundee City Council.

At its meeting on 20 March 2023, the Pension sub-committee of the Policy and Resources Committee and Pension Board approved the Fund's Treasury Policy Statement (Report no. 93-2023, article XI of minute refers) setting out the policies which would govern all lending transactions carried out by the Fund.

The Treasury Policy Statement requires that the Pension sub-committee of the Policy and Resources Committee and Pension Board will receive and consider the Treasury Management Strategy at the beginning of each new financial year.

On 20 March 2023, the Pension sub-committee of the Policy and Resources Committee and Pension Board approved the Fund's Treasury Management Strategy for 2023/2024 (Report no. 94-2023, article XII of minute refers).

This monitoring report covers the Treasury Management activity over the first six months of 2023/2024 financial year for cash held to pay pension benefits. Fund managers will also hold cash within custodian bank accounts, these amounts are excluded from this report.

5 ACTUAL LENDING

Variations in cash flow requirements mean that there will be surplus funds which will be invested for short periods (maximum of 364 days). Short term investments will be restricted only to those institutions identified in the Fund's Approved Counterparties list provided they have maintained a suitable credit rating.

An analysis of the lending position to 30 September 2023 shows:

Month	Lowest Amount Lent £m	Highest Amount Lent £m	End of month Amount Lent £m	Interest Rate Range %	
				Min	Max
April 2023	7,610	40.000	36.750	4.04	4.22
May 2023	27.575	37.135	27.575	4.14	4.45
June 2023	22.425	31.750	22.425	4.40	4.83
July 2023	14.335	25.410	14.335	4.69	4.96
August 2023	8.140	15.390	8.140	4.93	5.27
September 2023	2.860	12.485	2.860	5.18	5.35

All cash investments were compliant with Treasury Policy Statement as approved by sub-committee on 20 March 2023.

6 INTEREST RATE OUTLOOK 2023/2024

The Council's appointed treasury advisors (Link Group) assist the Council in formulating a view on interest rates. Link Group provided the following forecasts on 7 November 2023:

	Dec-23	**Mar-24**	**Jun-24**	**Sep-24**	**Dec-24**	**Mar-25**
Base Rate View	5.25%	5.25%	5.25%	5.00%	4.50%	4.00%
3m average earnings	5.30%	5.30%	5.30%	5.00%	4.50%	4.00%
6m average earnings	5.60%	5.50%	5.40%	5.10%	4.60%	4.10%
12m average earnings	5.80%	5.70%	5.50%	5.20%	4.70%	4.20%

	Jun-25	**Sep-25**	**Dec-25**	**Mar-26**
Base Rate View	3.50%	3.25%	3.00%	3.00%
3m average earnings	3.50%	3.30%	3.00%	3.00%
6m average earnings	3.60%	3.40%	3.10%	3.10%
12m average earnings	3.70%	3.50%	3.30%	3.30%

Bank of England Monetary Policy Committee has increased interest rates on three occasions this financial year which is their highest level since the Global Financial Crisis. The interest rate forecast table above shows base rate is expected to plateau at 5.25% during 2023 then begin to fall to 4.50% during 2024. A full economic update is available within appendix 1 of this report.

7 **POLICY IMPLICATIONS**

This report has been subject to the Pre-IIA Screening Tool and does not make any recommendations for change to strategy, policy, procedures, services or funding and so has not been subject to an Integrated Impact Assessment. An appropriate senior manager has reviewed and agreed with this assessment.

8 **CONSULTATIONS**

The Chief Executive and Head of Democratic and Legal Services have been consulted in the preparation of this report.

9 **BACKGROUND PAPERS**

None.

ROBERT EMMOTT
EXECUTIVE DIRECTOR OF CORPORATE SERVICES **12 DECEMBER 2023**

APPENDIX 1

Economics Update – September 2023

- The first half of 2023/24 saw:
  - Interest rates rise by a further 100bps, taking Bank Rate from 4.25% to 5.25% and, possibly, the peak in the tightening cycle.
  - Short, medium and long-dated gilts remain elevated as inflation continually surprised to the upside.
  - A 0.5% m/m decline in real GDP in July, mainly due to more strikes.
  - CPI inflation falling from 8.7% in April to 6.7% in August, its lowest rate since February 2022, but still the highest in the G7.
  - Core CPI inflation declining to 6.2% in August from 7.1% in April and May, a then 31 years high.
  - A cooling in labour market conditions, but no evidence yet that it has led to an easing in wage growth (as the 3myy growth of average earnings rose to 7.8% in August, excluding bonuses).
- The 0.5% m/m fall in GDP in July suggests that underlying growth has lost momentum since earlier in the year. Some of the weakness in July was due to there being almost twice as many working days lost to strikes in July (281,000) than in June (160,000). But with output falling in 10 out of the 17 sectors, there is an air of underlying weakness.
- The fall in the composite Purchasing Managers Index from 48.6 in August to 46.8 in September left it at its lowest level since COVID-19 lockdowns reduced activity in January 2021. At face value, it is consistent with the 0.2% q/q rise in real GDP in the period April to June, being followed by a contraction of up to 1% in the second half of 2023.
- The 0.4% m/m rebound in retail sales volumes in August is not as good as it looks as it partly reflected a pickup in sales after the unusually wet weather in July. Sales volumes in August were 0.2% below their level in May, suggesting much of the resilience in retail activity in the first half of the year has faded.
- As the growing drag from higher interest rates intensifies over the next six months, we think the economy will continue to lose momentum and soon fall into a mild recession. Strong labour demand, fast wage growth and government handouts have all supported household incomes over the past year. And with CPI inflation past its peak and expected to decline further, the economy has got through the cost-of- living crisis without recession. But even though the worst of the falls in real household disposable incomes are behind us, the phasing out of financial support packages provided by the government during the energy crisis means real incomes are unlikely to grow strongly. Higher interest rates will soon bite harder too. We expect the Bank of England to keep interest rates at the probable peak of 5.25% until the second half of 2024. Mortgage rates are likely to stay above 5.0% for around a year.
- The tightness of the labour market continued to ease, with employment in the three months to July falling by 207,000. The further decline in the number of job vacancies from 1.017m in July to 0.989m in August suggests that the labour market has loosened a bit further since July. That is the first time it has fallen below 1m since July 2021. At 3.0% in July, and likely to have fallen to 2.9% in August, the job vacancy rate is getting closer to 2.5%, which would be consistent with slower wage growth. Meanwhile, the 48,000 decline in the supply of workers in the three months to July offset some of the loosening in the tightness of the labour market. That was due to a 63,000 increase in inactivity in the three months to July as more people left the labour market due to long term sickness or to enter education. The supply of labour is still 0.3% below its pre-pandemic February 2020 level.
- But the cooling in labour market conditions still has not fed through to an easing in wage growth. While the monthly rate of earnings growth eased sharply from an upwardly revised +2.2% in June to -0.9% in July, a lot of that was due to the one-off bonus payments for NHS staff in June not being repeated in July. The headline 3myy rate rose from 8.4% (revised up from 8.2%) to 8.5%, which meant UK wage growth remains much faster than in the US and in the Euro-zone.

Moreover, while the Bank of England's closely watched measure of regular private sector wage growth eased a touch in July, from 8.2% 3myy in June to 8.1% 3myy, it is still well above the Bank of England's prediction for it to fall to 6.9% in September.

- CPI inflation declined from 6.8% in July to 6.7% in August, the lowest rate since February 2022. The biggest positive surprise was the drop in core CPI inflation, which declined from 6.9% to 6.2%. That reverses all the rise since March and means the gap between the UK and elsewhere has shrunk (US core inflation is 4.4% and in the Euro-zone it is 5.3%). Core goods inflation fell from 5.9% to 5.2% and the further easing in core goods producer price inflation, from 2.2% in July to a 29-month low of 1.5% in August, suggests it will eventually fall close to zero. But the really positive development was the fall in services inflation from 7.4% to 6.8%. That also reverses most of the rise since March and takes it below the forecast of 7.2% the Bank of England published in early August.

- In its latest monetary policy meeting on 20 September, the Bank of England left interest rates unchanged at 5.25%. The weak August CPI inflation release, the recent loosening in the labour market and the downbeat activity surveys appear to have convinced the Bank of England that it has already raised rates far enough. The minutes show the decision was "finely balanced". Five MPC members voted for no change and the other four voted for a 25bps hike.

- Like the US Fed, the Bank of England wants the markets to believe in the higher for longer narrative. The statement did not say that rates have peaked and once again said if there was evidence of more persistent inflation pressures "further tightening in policy would be required". Governor Bailey stated, "we'll be watching closely to see if further increases are needed". The Bank also retained the hawkish guidance that rates will stay "sufficiently restrictive for sufficiently long".

- This narrative makes sense as the Bank of England does not want the markets to decide that a peak in rates will be soon followed by rate cuts, which would loosen financial conditions and undermine its attempts to quash inflation. The language also gives the Bank of England the flexibility to respond to new developments. A rebound in services inflation, another surge in wage growth and/or a further leap in oil prices could conceivably force it to raise rates at the next meeting on 2nd November, or even pause in November and raise rates in December.

- The yield on 10-year Gilts fell from a peak of 4.74% on 17th August to 4.44% on 29th September, mainly on the back of investors revising down their interest rate expectations. But even after their recent pullback, the rise in Gilt yields has exceeded the rise in most other Developed Market government yields since the start of the year. Looking forward, once inflation falls back, Gilt yields are set to reduce further. A (mild) recession over the next couple of quarters will support this outlook if it helps to loosen the labour market (higher unemployment/lower wage increases).

- The pound weakened from its cycle high of $1.30 in the middle of July to $1.21 in late September. In the first half of the year, the pound bounced back strongly from the Truss debacle last autumn. That rebound was in large part driven by the substantial shift up in UK interest rate expectations. However, over the past couple of months, interest rate expectations have dropped sharply as inflation started to come down, growth faltered, and the Bank of England called an end to its hiking cycle.

- The FTSE 100 has gained more than 2% since the end of August, from around 7,440 on 31st August to 7,608 on 29th September. The rebound has been primarily driven by higher energy prices which boosted the valuations of energy companies. The FTSE 100's relatively high concentration of energy companies helps to explain why UK equities outperformed both US and Euro-zone equities in September. Nonetheless, as recently as 21st April the FTSE 100 stood at 7,914.
